ABOUT ME

I am a full stack web developer who specializes in modern web technologies, with strong proficiency in **JavaScript/TypeScript** and **React** for web application development. I have experience collaborating with **small and remote teams**. I am seeking challenging opportunities to build impactful products and grow within a dynamic environment.

EXPERIENCE

Freelance Web Developer & Personal Development, Montreal, QC (Previously Medellín, Colombia)

February 2022 - Present

- **Applied and advanced web development skills** through freelance projects, building features and resolving bugs for client applications.
- **Managed an international relocation** to Montreal, QC, and achieved a conversational level of French through 7 months of immersive full-time classes.

Shed Suite, Sarasota, FL, USA — *Lead Front End Developer*

February 2018 - February 2022

- **Spearheaded the development and maintenance** of a complex business management solution, initially focusing on front-end web applications before expanding into back-end services and mobile app development.
- **Led the implementation of new modules and features** across web applications, significantly enhancing user experience and responsiveness.
- **Oversaw the development of a new eCommerce platform**, contributing to strategic business growth.
- **Mentored and onboarded junior developers**, contributing to team skill development and project efficiency.
- **Identified and mitigated security vulnerabilities** within platforms, strengthening system integrity and data protection.

Language in Motion, remote, USA — *Front End Developer*

April 2017 - February 2018

- **Developed and maintained** an advanced language learning platform, collaborating with a diverse, remote team to enhance user experience and efficiency.
- **Built new, responsive user interfaces** and implemented new features within a complex React.js environment.
- **Improved application responsiveness** and resolved bugs, ensuring a seamless user experience.
- **Migrated the React state management system** from Flux to Redux, improving application performance and maintainability.
